•	Travel for Android requested
i Bill,	
	night vaguely be aware, I have been helping Andy Rubin with some
	ssociated with his Android platform. This has mostly taken the nelping negotiate with my old team at Sun for a critical license.
ndv ha	d also asked Frank Yellin and I to get involved in the evaluation of
Java a	acceleration architecture (silicon and surrounding software) done by
	work has been going on for years. TI is now trying to figure ther it has value and, if so, how to bring it to market. They would
	e to team up with Google/Android, and preferably Sun, to go out Google Android handsets. Tl has already come in and proposed
eir arc	hitecture to the Android group. I crashed that meeting, and all
	t sounds promising, but Andy doesn't think his team has the right und to evaluate the work more fully.
